

Phase 3 Deliverable #1. Database GUI Sketch

Title:

Sports Management Database User Interface

Overall Look:

File	Edit	Help											
Tables: <div><div>Players</div><div>Teams</div><div>Conferences</div><div>Games</div><div>...</div><div>...</div><div>...</div><div>...</div></div>	Data: <table border="1"><tr><td></td><td></td><td></td><td></td><td></td><td></td></tr><tr><td></td><td></td><td></td><td></td><td></td><td></td></tr></table>												
	Display Options: Team: <input type="text"/> Game: <input type="text"/> Year: <input type="text"/> <input type="radio"/> Save Data	 <input type="button" value="Update Data"/>											

<http://framebox.org/AKAZE>

FEEL:

The user interface consists of four parts which are respectively menu, tables, data and options to display. It allows for several simple queries such as searching teams by year by choosing the desired table and entering the expected display options. The data will pop out after clicking the “Update Data” button. The overall look is quite neat.
